

(Russian Constructivism): <http://keadesigner.com/nirajan-assignment-1/module01.html> (The history of the Micro

Computer):

<http://keadesigner.com/nirajan-assignment-2/index1.html>

Log: I was unable to start my class from feb 3, cause I got my visa a bit late, hopefully i was able to catch up with the most of html and CSS. I mostly focused on the fundamentals of html and CSS the whole week and started working on the assignment.

I started with the History of the Micro Computer at first because everyone in the class were focused on it, which also gave me a chance to get familiar with other students also I got the basic idea of the assignment. It was a bit challenging at first but with the help of some of my classmates and tutor I finally made a website with a grid based layout including navigations, internal links and other things.

The most challenging part for me was the grid layout, I didn't know how to separate the header from the main and aside from the footer. Also I've used a lot of division in the history of the micro computers. I also had some problem while uploading images but I worked that out.

After I completed the history of micro computer, working on Russian Constructivism was a bit easy for me.

Monday(17 feb):I started my regular class on this day,I learned about CSS grid

And started learning about basic html and CSS.I also learned about media queries and uses of it.I mostly focused on learning html and CSS.

Tuesday(18 feb):I learned about Navigations and Hyperlinks,to link internal pages to my websites.Along with that I also learned about Ordered lists(ol),Unordered list(ul).

Wednesday(19 feb):I started working on the history of the micro computer.I cam to the canteen and I asked the tutor to help me and started working on it.

Thursday(20 feb):I learned about html generic elements(divisions) ,to give class and special ID's to my semantic lanugages and link it with CSS. Also I learned about flex and to use it to design my navigation bar.

Friday(21 feb):I tried using the navigations bar on mobile phones and mostly focused on the assignment. I also completed my assignments and had some error which I had to correct and I started preparing my files to submit it on the wiseflow.
