

Photography Tutorial:

keadesigner.com/nirajan-assignment-photography/index.html

February24(Monday):I learned about Gestalt principles along with composition of layout, also I got to know about different art movements, art styles used in today modern world and some old art styles too. Then all of us were in the divided into group to analyze a website using gestalt law and layout composition. We all were given a specific art style from which we are to create a mood board. I was given swiss style.

February25(Tuesday):

I learned about wireframes which basically means a rough sketch layout of my website, also I learned about style tiles which is a virtual design rule for a website. I also learned about XD we all were provided with links for the tutorials.

February26(Wednesday):

I actually focused mostly on completing my mood board. I also made some rough sketches of a website.

February27(Thursday):

Today the topic was about logos and icons, I learned different ways to design a logo and icons also we are to use logo and icons on our new assignment which is photography tutorials.

I also learned different tools used in illustrator.

Feburary28(Friday):

Today we mostly focused on pen tools and using it to structure certain shapes in design and logos. I completed my mood board.

March2(Monday):

the main topic today was responsive websites and multi device layout patterns we focused on that we were asked to do a 5 second test I chose a logo which I designed for the assignment and took the test.

March3(Tuesday):

I learned about trunk testing and think aloud test which can be used for testing a webpage. I also learned about the meta tag .I also started working on photography tutorial.

March4(Wednesday):

I worked on the assignment the whole day.

March5(Thursday) and March6(Friday):

I continued working on the assignment and at Friday I realized I had made a mistake in my coding, Kenny helped me to know my mistakes which was related with responsiveness and layout. Unfortunately it was too late and I could not start over again. I tried to cover the mistakes as much as possible.
